## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-20, drawn to a method of preventing damage to the excitable cells, classified in class undetermined, subclass undetermined, for example.
  - II. Claim 21, drawn to an *in vivo* method for screening for a compound that increases transient potassium current, classified in class undetermined, subclass undetermined, for example.
  - III. Claim 22, drawn to an *in vitro* method for screening for a compound that increases transient potassium current, classified in class undetermined, subclass undetermined, for example.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are directed to different methods that recite structurally and functionally distinct elements, are not required one for the other, achieve different goals, and therefore constitute patentably distinct inventions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, recognized divergent subject

Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
